

WHITMAN COUNTY PUBLIC WORKS  
P.O. Box 430  
310 North Main Street  
Colfax, WA 99111

County Road Division, Mark Storey, Director, (509) 397-6206 or Brian Wilson, Operations Manager, for questions or access for inspection.

**REQUEST FOR VENDOR QUOTE**

SPECIFICATIONS:

Whitman County is requesting vendor quotes from qualified suppliers to provide bridge superstructure and substructure elements for Whitman County maintenance staff to install. Bridge superstructure elements shall be made of modular structural steel bridge elements and delivered to the construction site just south of Pullman, Washington.

Construction of the bridge is to commence around the first of September, 2024, and be completed around the middle November. The suppliers work is required to be complete and delivered to the bridge site in two separate shipments, one no later than the third week in September, and the other no later than about the end of October. The intent is to build a portion of the bridge (32 feet wide) in September (right next to the existing bridge), then remove the old bridge and build the other 40 foot side portion of the bridge where the old bridge was situated. It is anticipated that the bridge elements will come in 8 foot wide modular pieces (+/-) so the bridge can be constructed in two phases.

Bidders are encouraged to visit the project site to become familiar with the existing site conditions and the general elements of the project. All work shall come with a minimum 1-year warranty.

The Contractor is responsible for:

- Coordinating all work with the Owner. Providing submittals of all work products, construction quality control, and demonstrating performance with the requirements of the specifications.
- Employing necessary safety precautions throughout project execution.
- Supplying all equipment to execute and perform the job.
- Supplying all of the materials to execute and perform the job.
- Cleaning up after the project is complete. Including any overspray onto electrical conduit or lights.
- Project to conform to prevailing wage laws of Washington State.
- Maintain general liability insurance on all vehicles.
- Bridge elements: modules necessary to build a superstructure that is 40 feet long and 72 feet wide. (72 wide travel way, inside rail to rail).
- Steel beams (rolled) – A588 weathering steel.
- Include all bearing plates and levelling pads.
- Bridge deck surface – Galvanized 12x4-1/4 inch roll or press break formed panels, configured to accept hot mix asphaltic paving.
- All affiliated hardware

- Design drawings stamped by a licensed engineer for HL-93 loading.
- Includes all delivery charges. Unloading and installation by others.
- Actual schedule of delivery dates will be mutually agreed to by both parties and are subject to reasonable adjustments.

**QUOTES MUST BE RETURNED BY: Friday, April 19, 2024 by 5:00 p.m.**

**BASIS OF AWARD:**

All materials, equipment and labor	\$ _____
Subtotal (before tax) (Basis of Award)	\$ _____
Sales Tax 7.9%	\$ _____
Project Total	\$ _____

Additional service available in support of the project (such as pre-formed footing elements and backwall materials)
